

CES Stock Module

ces|software

Stock control made easy

Have you got it when people want it? The success of any stock-holding business is dependent on supply always meeting demand. Whether you're a restaurateur or a retailer, accurate stock control is a 'must have'. That's why we've created CES Stock: the easy way to keep on top of the ins and outs of your business.

- Set up and review information by PLU, department or supplier
- Set up order templates to reduce potential ordering errors
- Add comments or reminders for suppliers
- Review past, current, and outstanding orders in an instant
- Speed up the 'goods in' process: check deliveries against the original order created
- Confirm full or part delivery to specific orders
- Comprehensive Stock Adjustments feature
- Manual or semi-automatic* stock-take options
- Complete Variance Management gives quick-scan access to stock levels
- Multiple reporting features including stock discrepancy

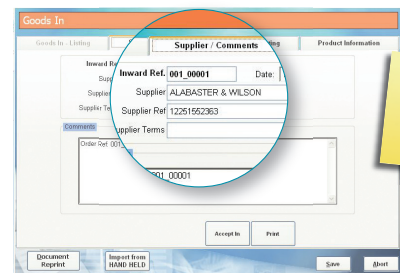

Easy ordering

This software module fosters faster, more efficient and accurate working. Easy to use and configure, you set it up in the way that's best for your particular business.

* CES Stock module can link into a handheld PDE, enabling item barcode scanning followed by manual entry of the item quantity.

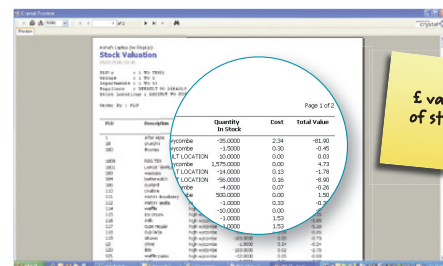

Easy management

Incomplete orders, breakages and returns can complicate the stock-control process. CES Stock keeps you in control so you get what you pay for, and only pay for what you get.

Easy on the bottom line

Over-order and you lose money, under-order and you lose money; it's a fine line. Up to the minute, accurate information can help you take stock and make the right decisions at the right time.
